RECOMMENDATIONS

- Many negative reviews stem from a disrupted user experience caused by bugs or crashes. Therefore, the top priority should be focused on reducing errors and improving app loading speed.
- Reduce the frequency of ads and adjust their placement so they don’t interfere with the user experience, especially when users are reading information within the app.
- Continue to maintain a user-friendly interface and easy navigation. Additionally, ensure that information is always accurate and up-to-date, as this is the primary driver of user satisfaction.
